## SUMMARY

Highly motivated front-end developer with experience in developing responsive, dynamic websites and web applications. Striving to build beautiful UI/UX and passionate about learning new web technologies to tackle the unknown.

---

## EXPERIENCE

### Frontend Developer (Creative Technologist)

Gorilla Group

March 2020 - Present, Montreal, QC

- Participate in the full production cycle and maintenance of multiple B2B/B2C e-commerce storefronts that include utilizing the SAP Hybris platform and in-house web applications
- Build/maintain custom component libraries that use an atomic design system approach, and collaborate with designers to implement dynamic, client-side interfaces and functionality
- Translate design mockups from Figma/InVision/Sketch into responsive code while adhering to best practices for accessibility, UX, SEO, and performance along with following functional specs

### Clubs Website Developer

Students' Society of McGill University

January 2019 - January 2020, Montreal, QC

- Responsible for designing, developing, and maintaining highly customizable WordPress websites based upon delivered requirements
- Provided workshops on effective regular website maintenance and best practices to achieve correct WordPress theme usage
- Assisted in the production of informational content regarding website guides and documentation

### Web Developer Intern

Fitcitie, Bansi Inc.

August 2017 - June 2018, Montreal, QC

- Designed and developed a responsive customer loyalty and rewards webpage using HTML, CSS, jQuery, and Bootstrap

---

## PROJECTS

### react-browse-movies

- A React application that showcases movies and information using React Hooks and The Movie Database's (TMDb) API
- Used Reach Router to support declarative routing and Styled Components to design components

### Budgey

- A full-stack budgeting application that is dynamic and intuitive on managing and visualizing personal finances
- Built with React.js, Axios, Bootstrap 4, CSS, Ruby on Rails (w/ Active Record), and PostgreSQL

### MANABA

- Built a multi-paged website for MANABA using WebPack, Javascript, jQuery, HTML, CSS/SASS, and Bulma framework with Google Analytics implemented to measure and optimize SEO success

---

## AWARDS

### Front-End Developer

FoodSmart - 2nd Place Winner • Business Development Bank of Canada (BDC) Hackathon • March 2018

- Developed an innovative solution by directly connecting to clients looking to optimize their lifestyle with personalized meal plans derived from their genetic data using BiogeniQ's API

---
