SUMMARY

Highly motivated Front-End developer with experience in developing responsive websites and web applications. Striving to build beautiful UI/UX and passionate about learning new web technologies to tackle the unknown.

EXPERIENCE

Clubs Website Developer

Students' Society of McGill University   **January 2019 - January 2020, Montreal, QC**

· Responsible for designing, developing, and maintaining highly customizable WordPress websites based upon delivered requirements
· Provided workshops on effective regular website maintenance and best practices to achieve correct WordPress theme usage
· Assisted in the production of informational content regarding website guides and documentation

Web Developer Intern

Fitcitie, Bansi Inc.   **August 2017 - June 2018, Montreal, QC**

· Designed and translated UI/UX wireframes and mockups (PSDs) into a fully functional, responsive website using HTML, CSS, jQuery, and Bootstrap
· Collaborated with back-end developers on developing a user interface for a customer loyalty and rewards system

PROJECTS

react-browse-movies

· A React application that showcases movies and information using React Hooks and The Movie Database's (TMDb) API
· Used Reach Router to support declarative routing and Styled Components to design components

Budgey

· A full-stack budgeting application that is dynamic and intuitive on managing and visualizing personal finances
· Built with React.js, Axios, Bootstrap 4, CSS, Ruby on Rails (w/ Active Record), and PostgreSQL

MANABA

· A fully responsive, multi-paged website built using HTML, CSS, JavaScript, jQuery, and Bulma CSS framework

AWARDS

Business Development Bank of Canada (BDC) Hackathon

FoodSmart - 2nd Place Winner · Front-End Developer · March 2018
· Developed an innovative solution by directly connecting to clients looking to optimize their lifestyle with personalized meal plans derived from their genetic data using BiogeniQ's API

EDUCATION

B.Sc. Software Engineering

McGill University · Montreal, QC · 2019
